GROWSPAN ROLL-UP LOW PRO TUNNEL PROVIDES VENTILATION OR TOTAL DARKNESS IN SECONDS

The GrowSpan Roll-Up Low Pro Tunnel utilizes an innovative, low-profile design that allows growers to quickly ventilate crops by rolling the cover into the roof's peak or protect and blackout crops by deploying the cover - all with a simple twist of the wrist. The tunnel is an economical growing solution, and, when outfitted with a blackout cover, the Low Pro can provide complete light deprivation, enabling growers to control the flowering cycle.

The GrowSpan Roll-Up Low Pro Tunnel Advantage:

Extend growing seasons and get to market earlier - Start growing earlier, harvest later.

Multiple cover options - Create an ideal environment with 6 mil clear greenhouse film or 6 oz. black/silver covers for blackout purposes.

Durable construction - Built from 14-gauge, USA-made, triple-galvanized structural steel.

Total light deprivation - Control cycles and when crops are harvested.

Easy operation - Just one grower can retract or deploy the cover.

End panels - Feature a zippered center for easy access.

Heavy-duty ground posts included.

Compact design - 5' peak with 32" clearance on the sides.
