## **GROWSPAN SERIES 2000** COMMERCIAL GREENHOUSES FEATURE "BOMB-PROOF" POLYCARBONATE CLADDING FOR **STRENGTH AND SECURITY**

S2000 Commercial Greenhouses are the go-to option for commercial cannabis producers that require rigid cladding to meet local buildings codes or to provide additional protection from severe weather or theft. The gable-roof design provides aesthetic appeal, and in-house design and engineering ensures cannabis growers get the greenhouse they need.

### The GrowSpan Series 2000 Commercial Greenhouse Advantage includes:

Extra-tall, gable-style roof - 6/12 pitch roof is ideal for regions with heavy snow. Taller, adjustable sides allow for maximum growing space.

Covered with durable, ultra-strong polycarbonate.

Optional stamped engineered drawings stamped by a licensed, in-state engineer available.

Ridge Vents and Breathable Wall options - Maximize ventilation and air exchange, even while blacked out.

Superior structural strength - USA-made, triple-galvanized steel frame.

Light diffusing cover options - Reduce plant stress, increase photosynthesis.

Optional, fully automated blackout systems - Provide complete light deprivation.

Controlled Environment Agriculture (CEA) packages available - Gain complete environmental control, ensuring the healthiest, most-profitable crops.
