

NFT SYSTEMS

HydroCycle NFT Systems enable profitable crops year-round with minimal labor.

HydroCycle NFT Systems allow growers to produce leafy greens and a wide range of high-quality crops with ease. The recirculating system ensures crops are nourished without requiring traditional labor, making it a great system for professionals looking to achieve more frequent, robust and profitable harvests.

The HydroCycle NFT Systems Advantage

Custom and stock designs - Get the system that best suits your operation.

Efficient, sustainable design - Recirculating system keeps roots healthy and limits water and nutrient waste.

Durable construction - Galvanized steel frame and sturdy, UV-stabilized plastic channels.

NSF-certified channels - Safe for food use.

Space-saving vertical designs - Vertical systems are great for when space is an issue.

Numerous channel sizes - Find the right setup for your operation and grow even larger varieties.

Systems come complete with all necessary hardware and accessories.
