

# SERIES 550

## GrowSpan S550 High Tunnel Greenhouses

let growers extend their season or harvest year-round

Series 550 High Tunnel Greenhouses create an optimal growing environment at any time of year. The single-layer, anti-condensate film ensures superior light transmission and condensation control, while the optional Inflatable Double Film Kit increases R-value and protects crops during winter.

### The GrowSpan S550 Advantage

**Versatile design** - Structures can be used by commercial growers across all industries.

**Exceptional growing environment** - Extend the season or grow year-round in any region.

**Extra height to mitigate humidity and provide abundant interior space.**

**30'W with lengths of 72' and 96'** - 16-gauge, 1" x 3" oval galvanized steel framing.

**Easy ventilation** - Manual roll-up sides allow for on-demand natural ventilation. Insect netting protects against pests.

**Rugged end walls** - Constructed from heavy-duty aluminum framing and 8 mm twin-wall polycarbonate.

**Optional rafter support kits offer additional strength in areas with heavy snow or high winds.**
